CAREER OBJECTIVE

As an accomplished Senior Software Engineer with over 9 years of hands-on experience in technologies such as .Net, C#, SQL Server, Azure DevOps, Angular, and Bootstrap, I bring a wealth of expertise to any software development project. My proficiency extends to web applications, Windows services, and Rest APIs, and I have a proven track record of seamlessly transitioning into Scrum Master roles when needed. I thrive in dynamic, diverse work environments where collaboration fuels innovation, and my unwavering commitment to excellence drives continuous improvement.

EXPERIENCE

April 2022 - Present

Backend Software Engineer

FARFETCH Platform Solutions

- Working on a microservices heavy environment, developing new services and maintaining old ones, collaborating with other teams to achieve the best solution meeting the business needs
- Aside of the sprint work, I took ownership and performed meaningful changes of a couple of applications responsible of creating and managing API Specifications.
- Technologies: Docker; .Net 6, MongoDB, Kafka, Swagger (API Documentation), Jenkins (Pipelines), GitLab (Versoning), Jira (Board/Tasks tracking), etc.

February 2022 - April 2022

Senior Software Development Analyst

Philips

- Leading the development, refining the items with the team, aligning expectations with the Product Owner, helping other team members with technical and requirement doubts and ensure the correct development following the quality standards required by performing code review, doing Pair Programming whenever required, and ensure the correct implementation of the unit tests
- Technologies: .Net Framework 4.6.2, T-SQL, WPF, xUnit, Azure Pipelines, Jenkins

May 2021 - January 2022

Software Development Analyst

Philips

- I joined the company as part of a team responsible of maintenance and bugfixes for the Cardiology Informatics products and tools

- I took part on the creation of a new team responsible for the serviceability of some products
- Highlighted projects: a tool used for system health verification before and after product installation, and the international collaboration for the development of a proactive monitoring tool
- Net Framework 4.8, 2019, Prometheus, Grafana

October 2020 - April 2021

Senior Software Engineer

Tata Consultancy Services

- Developing software for the brazilian branch of SwissRe, one of the top insurance companies of the world, always analyzing the requirements and suggesting ways of improving the value by understanding the business needs.
- The responsibilities of this role include developing high performance code, helping other team members on solving issues and clarifying doubts, reviewing the Pull Requests submitted from the team members (20+ developers) Page 2 of 4 ensuring the correct implementation of the architecture standards, use Azure DevOps for running pipelines and creating releases for pre-UAT environments.
- I am also the scrum master of one of the 5 existing squads, managing the ceremonies and ensuring the continuous delivery of value to the client Technologies:
  The technologies used are C#, .Net 4.6 and SQL Server 2016 for back-end, and for the front-end javascript, AngularJs, Bootstrap, Razor and JQuery
- Tools: Azure Devops (Azure Boards, Azure Repos, Azure Pipelines), Git, Visual Studio 2019, SQL Server Management Studio, SoapUI and Rabbit MQ
  The role often requires maintenance on older applications as w

January 2017 - October 2020
